Summary

Full Stack Developer with hands-on experience building and shipping production-ready web and mobile applications using React, Next.js, and React Native. Skilled in creating seamless user experiences, developing scalable backends with Node.js and MongoDB, and integrating REST APIs across the full stack in fast-paced, collaborative environments.

Projects

Course Marketplace Platform | *React, Node.js, MongoDB, Razorpay, Firebase Auth* [GitHub](#) | [Live Demo](#)

- Built a full-stack MERN-based platform for buying and selling online courses with secure authentication and payment integration.
- Integrated **Firebase Authentication** for secure user login and role-based access control for admins and users.
- Implemented **Razorpay** payment gateway for seamless and secure transactions.
- Designed responsive UI and optimized backend APIs for efficient course management and user experience.

Code Veda 2.0 – Hackathon Website | *React.js, Three.js, Vite, Figma* [GitHub](#) | [Live Demo](#)

- Developed an interactive hackathon website featuring event details, schedules, and user engagement features.
- Designed immersive **3D UI components** using Three.js to enhance user experience.
- Implemented responsive design for seamless performance across devices.
- Collaborated on UI/UX design using Figma and optimized frontend performance using Vite.

Velocity – Grocery Mobile App | *React Native, Firebase, Node.js* [GitHub](#) | [APK](#)

- Developed a **cross-platform grocery shopping mobile app** with real-time data synchronization.
- Implemented cart management and order processing features for smooth user experience.
- Integrated Firebase for authentication and real-time database operations.
- Designed **mobile-first UI** with smooth navigation and optimized performance.

Grocery E-Commerce Admin Panel | *React, Node.js, MongoDB, Firebase* [GitHub](#) | [Live Demo](#)

- Built an admin dashboard for managing products, orders, and analytics of an e-commerce platform.
- Implemented **product and inventory management** with real-time updates.
- Developed order tracking system and integrated backend APIs for seamless data handling.
- Designed intuitive UI for efficient admin operations and improved workflow management.

Experience

Web Developer October 2025 – Present
Geek Room ADGIPS Delhi, India

- Led development of the **Code Veda 2.0 Hackathon Website** using React and Three.js, building interactive 3D UI components and integrating event workflows.
- Developed and maintained **responsive web applications** ensuring high performance, cross-device compatibility, and seamless user experience.
- Collaborated with design, backend, and QA teams to deliver production-ready features within deadlines.

Full-Stack Developer January 2026 – Present
Freelancer Remote

- Built full-stack web and mobile applications using **React, Next.js, and React Native** with features including authentication, real-time booking, and in-app communication.
- Developed and integrated scalable backend APIs using **Node.js and MongoDB**, managing end-to-end architecture, deployment, and performance optimization.
- Delivered cross-platform mobile and responsive web experiences ensuring consistency across devices.

Technical Skills

Languages: C/C++, Python, JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, Redux, Framer Motion

Mobile: React Native, Expo, Expo EAS, Push Notifications

Backend: Node.js, Express.js, Django, REST APIs, GraphQL, WebSockets

Databases & Cloud: MongoDB, MySQL, Supabase, Firebase, Redis

Dev Tools: Git, GitHub, Docker, Postman, VS Code, Vercel, Render

Relevant Coursework: Data Structures & Algorithms, Operating Systems, OOPS, DBMS, Software Engineering

Areas of Interest: Full-Stack Web, Cross-Platform Mobile, AI Integrations, Impact-Driven Solutions

Hackathons & Achievements

Foodoscope Fork It Challenge 2025 – Certificate of Participation <i>IIIT Delhi Team NullPointers</i> – Built NutriVision in 36 hours – a full-stack AI web app using MobileNet for food image recognition, providing nutrition breakdown, flavor profiles, and tailored recipes. – Certificate: Google Drive Link	February 2026 <i>Delhi</i>
HackSmart – 36-Hour Hackathon – Certificate of Achievement <i>Battery Smart, Gurugram Powered by AWS & Code India Forward</i> – Developed a Digital Twin for Battery Swapping Infrastructure using a data-driven approach to optimize station load, detect congestion points, and forecast demand trends. – Certificate: Google Drive Link	January 2026 <i>Gurugram</i>

Education

Dr. Akhilesh Das Gupta Institute of Professional Studies <i>Bachelor of Technology in Computer Science and Engineering, CGPA: 8.2/10</i>	2024 – Present <i>Delhi, India</i>
